

Build In Blockchain is an initiative to build a community dedicated to developing the Blockchain Ecosystem and its association with other Emerging Technologies while expanding the role of the market in the global blockchain industry by creating a conducive business environment, and promoting decentralization, transparency and strengthening the talent pool.

Started by [Blocklogy](#), this campaign aims to create awareness about Blockchain and its applications and make it more accessible to businesses in day to day life. Become a strong Foundation & Champion Blockchain Association with the oriented vision, for building the tech ecosystem and industry narrative to catalyse skill building, research, start-up programs, facilitate business and increase industry outreach.

Benefits of Blockchain implementation are advance innovations focused on equality, transparency, unbiased and decentralization. Our strategic imperatives are to skill workforce on blockchain to ensure that the talent is future-ready for next-gen technologies, to trigger blockchain adoption across industry verticals and accelerate the usage and impact domains like healthcare, agriculture, and manufacturing.

Build In Blockchain also focus on empowering Academics & Organizations to issue their own certificates on the Blockchain, making it more transparent and authentic. The whole idea is to create a public ecosystem through an open-source network where people can issue and verify certificates for Students, Hiring, Employee Verification, Reviews, and other multiple perspectives.

The common initiative starts with Build In Blockchain Series. Build In Blockchain e-Conclave 2020 is one of it, where like-minded people will gather under one roof to discuss and offer solutions based on Blockchain Technology and make next-gen technology education easier and affordable, increase the availability of mentors and guidance, to ignite the spark within young tech enthusiast.

Be Future Ready

Create Global HUB for multiple Solutions to meet the increasing demand of existing traditional platforms for overcoming its limitations and problems with an adaption of Blockchain & other emerging technologies

Create Talent Pool

To build a strong pool of Blockchain Talents, Experts, and professional's and provide an easily accessible platform to connect & collaborate with Corporate, Government, Education Institutes, Start-ups, and other diversified sectors

Network of Innovators

Create Opportunity for Technology Disruptors &
Forward-thinking startups to share their
experience & co-create innovative new ideas for
the betterment of society

Launchpad for Start-ups

Benefiting small startups, firms and an organized vision at a vast level by promoting your ideations and solutions to the larger audience and media

Research & Development

Create blockchain a forefront technology and invite Emerging technologies enthusiasts to conduct meaningful Research & Development on a larger scale. Collaboration at Github level with open source developers and contributors for the development of a significant community and giving people opportunities to be a step ahead

Spotlight Innovation

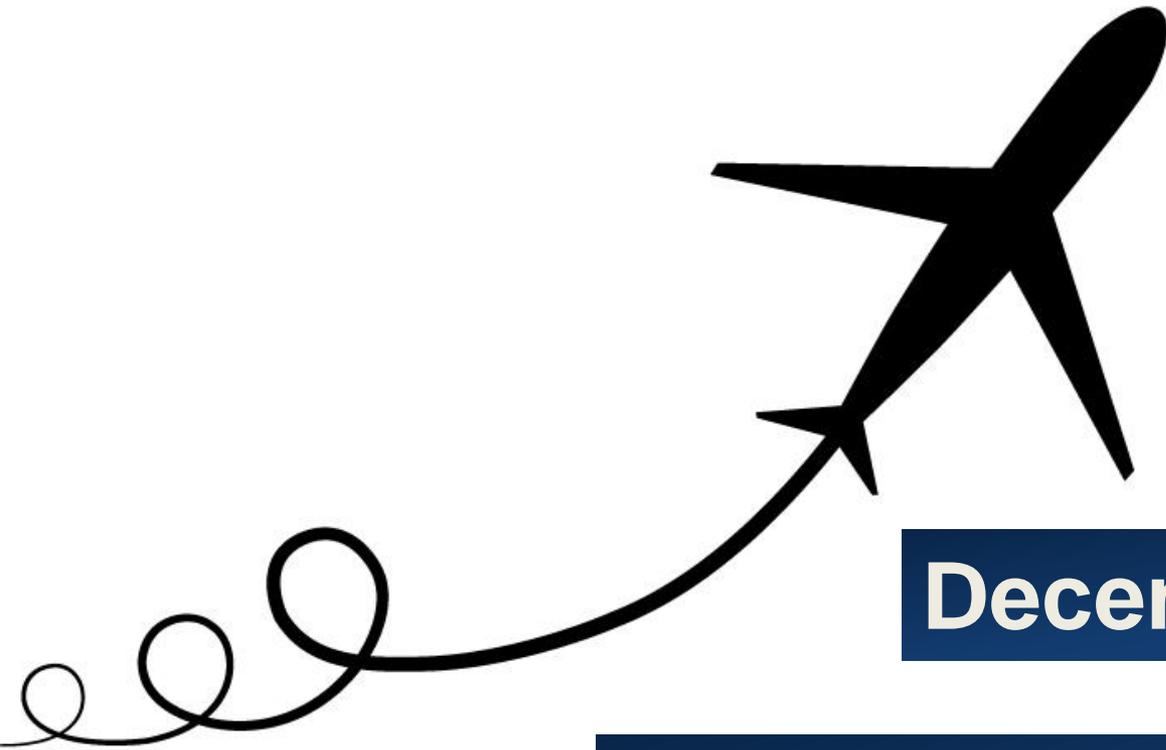

To build a common technological platform where firms can share and showcase their success stories and get a chance to meet up different organizations and new businesses to create new and innovative opportunities

Bridging the GAP

To educate the youth on Blockchain its application in collaboration with mentors and guidance, to ignite the spark within young tech enthusiasts so they can bring innovative blockchain technology solutions in the current market. Blockchain training & Workshops for the community to train and create awareness on real uses cases & solutions

Decentralized Ideation

With the decentralization approach, there can be equality for every idea and equal opportunity for every initiative done by various organizations, which can lead to major tie-ups and collaborations between different sectors and create a healthy marketplace with equal opportunities

Blockchain Solutions

Create Global HUB for multiple Solutions to meet the increasing demand of existing traditional platforms for overcoming its limitations and problems with an adaption of Blockchain & other emerging technologies
